

■rails 3 測試環境

註：以下RVM環境不建議用 Rails 3.0.0 版本，會出現(Gem::ConflictError)錯誤！

```
rvm list
rvm install 1.9.3
rvm use 1.9.3
ruby -v #1.9.3
rvm gemset create rails326
rvm use 1.9.3@rails326
gem i rails -v 3.2.6
rails -v #3.2.6
rails _3.2.6_ new project -d mysql
cd project
vi Gemfile (修改 gem 'mysql2' 成為 gem 'mysql2', '0.3.20')
vi config/database.yml (加入mysql root密碼)
rake db:create
rails g scaffold User name:string age:integer profile:text
rake db:migrate
vi config/routes.rb (加入 root :to => 'users#index')
rm -rf public/index.html (刪除預設首頁)
rails s (打開瀏覽器，輸入網址 http://localhost:3000) => OK!
```

= END =
